

# Answers to Laminate Flooring FAQs

Q

A

What is laminate flooring?

Contrary to popular belief, laminate is not made from plastic. It's a multi-layered synthetic flooring product that includes a layer of high-density fiberboard (HDF) or medium-density fiberboard (MDF).

How long do laminate floors last?

15 to 30 years

What are the benefits of laminate flooring?

Highly durable

Easy to clean

Stain resistant

How do you maintain laminate floors?

Regulate indoor humidity

Sweep regularly to avoid scratches

Apply felt pads to furniture legs
