

# Porcelain vs Stone:

## Which Style is Right for You?

Get to know the pros and cons of porcelain and natural stone tile flooring here!

What's the latest trend in porcelain tile? Large format tile (LFT).

Sizes can range from 24"x24" to 40"x120"

So many styles, from concrete and marble to wood and stone

Larger tiles mean fewer grout joints and easier to clean

Fewer grout areas for mold and mildew build up

### Pros of Porcelain Tile Flooring

More durable than many ceramic tile products

Very resistant to stains, scratches, and moisture

Low maintenance and don't require special sealing

### Considering natural stone flooring?

### Pros of Natural Stone Flooring

Natural, eco-friendly material

Long lasting and great heat retention

Available in marble, granite, limestone, slate, quartz, sandstone, and more

### Cons of Natural Stone Flooring

Requires frequent cleaning

Requires regular sealing treatment

Higher cost than most flooring materials
