

The Durability of Strand Woven Bamboo Flooring

Strand woven bamboo flooring is extremely durable and has many benefits that differentiate it from standard bamboo flooring.

What are they?

Strand woven bamboo flooring is:

One of the hardest and most durable flooring materials on the market

More resistant to moisture

More easily refinished than traditional bamboo if scratches or dents appear

How is it made?

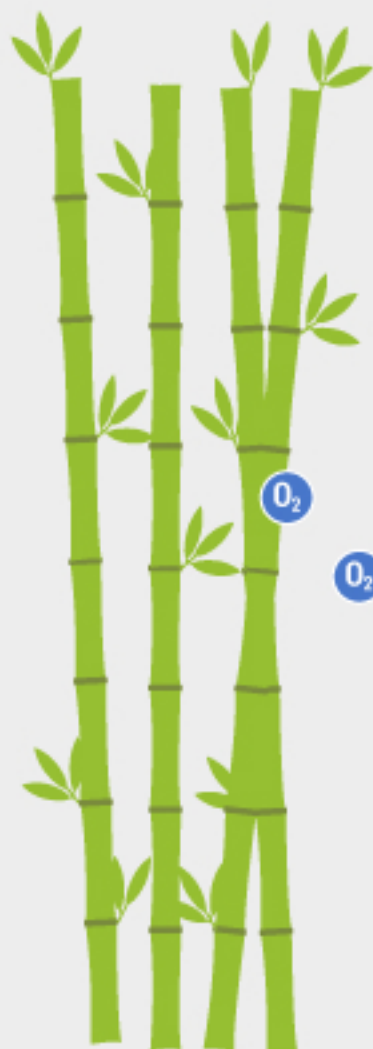

Manufactured by processing raw bamboo beams into long, cross-linked fibers, then drying and pressing them into a floor beam

Facts about bamboo:

5-7 years

Time it takes for bamboo to reach full strength potential

► **60 feet**

Height a bamboo plant can reach

60 years

Time it takes for hardwood trees to mature

30% MORE

The amount of oxygen bamboo plants produce compared to a hardwood forest
